## AutoCAD

Use the keygen, which will generate a license file with the licence number you specified. Save the keygen file on your computer. Install Autodesk Autocad and activate it. Open the Autodesk Autocad licence file and read the licence number. Enter the number you have read from Autodesk Autocad to the licence file. Save it. Copy the licence file and save it on your computer. If you had copied the licence file, replace it with the new one, which will enable you to use Autodesk Autocad. Note: The Autodesk Autocad licence file is a key file and it is saved in the Autocad root folder on your computer.

### What's New in the AutoCAD?

A new, built-in tool for export-to-PDF allows you to easily save a drawing to PDF and send it out to your designer or customer. (video: 3:40 min.) New: Export to PDF and Save to PDF: Export to PDF No need to save a copy and open it in a PDF viewer. Just save your drawing to PDF, then send it to the appropriate recipient. Save to PDF Save your drawing as a PDF and then send it to a recipient. Create an auto-generated PDF with all the annotations and updates you've made on the original drawing. Improved: Export to AutoCAD Web App (Desktop View) Export to AutoCAD Web App (Desktop View) The easiest way to create a PDF from AutoCAD. After you export to PDF, the exported file will be available for anyone to download. Simply download the file from your web browser and they can view and comment on it directly on AutoCAD.com. (video: 1:15 min.) Improvements: Enhanced value formatting – Formatting a value to currency is now easier to do, faster, and more accurate. – Formatting a value to currency is now easier to do, faster, and more accurate. Type preview – You can now see the type of data that will be stored in the drawing when you are editing text. – You can now see the type of data that will be stored in the drawing when you are editing text. Line thickness indicator – You'll now see a thicker line to indicate the thickness of the line you're creating. – You'll now see a thicker line to indicate the thickness of the line you're creating. Zebra strip – Select a color for a whole row of data or for a partial row of data, then instantly see every instance of that color in the drawing. – Select a color for a whole row of data or for a partial row of data, then instantly see every instance of that color in the drawing. Column sub-headings – Viewing sub-headings in columns is now easier and faster. – Viewing sub-headings in columns is now easier and faster. Step sizes and fonts – Sub-headings and step sizes are now more clearly identified. – Sub-headings and step sizes are now more clearly identified. Auto-r
