With Windows 10, Microsoft thought of a good way to improve the internet browsing experience, apart from introducing several new features. One of such features is the browser's speed dial, which allows you to quickly open preferred websites without leaving the current webpage. Windows 10's browser, named Internet Explorer 11, comes with its own speed dial feature that saves your frequently visited web pages, allowing you to quickly open them without having to visit the browser's bookmarks bar. Here's how to quickly open your favorite websites on your Windows 10 machine with the Internet Explorer 11 speed dial feature. Note that, depending on the browser's version, this feature may be disabled. In that case, you can manually disable the speed dial feature. Open the IE browser. Right-click on the browser's address bar and click on the shortcut icon to open it. Click on 'Settings' at the bottom of the opening window. Go to the 'On Start' tab and click on the dropdown menu and select 'Speed Dial'. A list of

Still, Windows 10 is a great operating system, and it has put a couple of new features into the guide to make it a lot easier to use. Windows 10 has been doing a lot of work to improve the guide and make it easier to use, but it still doesn't... NetGuru 14/01/2018 02:33 I find that Windows 10 has really stepped up its game to compete with other operating systems. It has improved the guides to make it easier to use and, once you have it set up, the operating system does a decent job of protecting your privacy. The app does a decent job of making sure it doesn't collect too much information and there are a few useful tools for it to collect. This guide to Windows 10 might help you... #tutorials #guide #operating #windows #login #lg Leave a Reply Skipstone 14/01/2018 04:16 Are you looking for a simple to use network management tool that lets you manage and monitor your business network at a glance?
