Well, I guess the best I can say is that it is time traveling, space, and now, RPG! I'll name it, "Dragon's Song". Perhaps I could be considered a person who doesn't think to the future, because in this game, we follow an unknown hero who is unknown in the future. When I was young, I thought that time would go on for all eternity. However, one day, the world began to vanish, and now, it is caught in the world that has become blurred between time and space, the Lands Between. On this world that has lost the past and future, our hero's footsteps become the world's long-lost epic journey. What is the Lands Between? It is a world where time and space has intersected. A space where the boundary between light and dark is gradually fading away.
